

Team: Team 36

Members Names: Keith Pattison, Hamdan Siddiqui

Multiplier Distribution: Keith Pattison: 1.5

Hamdan Siddiqui: 1.5

Statement regarding Multiplier Accuracy

"We firmly believe that both of us did this project with absolutely no help from David Holdren. We firmly believe that he shouldn't get any credit for being part of the project, since he wasn't even in contact with us, except for the first week. We believed that he was helping us, until he stopped showing up to lab, and responding to our communication attempts. Prior to him disappearing he contributed nothing to the project, so therefore the two of us completed this entire assignment by ourselves. Both of us should receive a 1.5 multiplier as a result of completing the required work for a three person team with only two. Both of us have been forced to sacrifice more time, and energy for this project than our schedules allow, and as a result should be compensated for any lack of performance our code might possess"

"This report represents my best assessment of the contributions of me and my teammates. It is a true and accurate evaluation to the best of my ability."
